Rociador AutoClean (Autolimpiable)

PÁG.119

Debido al uso, la cal se posiciona gradualmente en los orificios de salida haciendo que el agua no caiga de forma uniforme. Con el rociador Auto limpiable evitamos esta situación.

After using it, the lime blocks the water outlets. With the rain shower self-cleaning we will avoid this situation.

Avec le temps, le calcaire se dépose progressivement sur les orifices de sortie ce qui entraîne une déformation du jet d'eau. Avec la pomme de douche autonettoyante nous évitons cet inconvénient.

El rociador Auto limpiable evita que se taponen los orificios de salida de agua a través de un sistema interno por agujas.

The shower rain self-cleaning avoids the water outlets to be blocked due to an internal system with needles.

La pomme de douche autonettoyante évite l'entartrage des jets d'eau, grâce à un dispositif intégré qui combine gravité et pression d'eau pour nettoyer les orifices.

El sistema consigue mantener la trayectoria original de la salida del agua ofreciendo una sensación natural de lluvia.

The system maintains the original water trajectory offering a natural rain sensation.

Ce dispositif permet au jet d'eau de conserver sa trajectoire originale vous offrant une sensation de pluie naturelle en permanence.
